

EUROPEAN ART THROUGH THE AGES (I)

MIDDLE AGES TO THE RENAISSANCE

Timeline

THE MEDIEVAL PERIOD / MIDDLE AGES / DARK AGES (500-1400)

What were the Middle Ages like? Where did this idea come from?

CHRISTIANITY AND ART

Madonna and Child
ca. 1290-1300
Duccio di Buoninsegna

- ▶ Wasn't entirely a period of no progress or changes: marked by growth of Christianity (Catholicism)
- ▶ After the fall of the Roman Empire, the Catholic Church became the most powerful institution of the medieval period. Christianity, and specifically Catholicism brought with it new views of life and the world that rejected the traditions and learning of the ancient world.
- ▶ Visual art prospered: manuscripts, church murals and ritual items created to spread Christian faith
- ▶ Few names of artists survive and fewer documents record their business dealings, but they left behind an impressive legacy of art.

The Problem of Realism in Medieval Art

Praxiteles, Aphrodite of Cnidos, Roman marble copy after fourth century Greek original

Master of the Geneva Latini, *The Visitation*, c. 1470, France

- ▶ When God dictated the ten commandments to Moses on Mount Sinai, God expressly forbade them from making any **“any graven image, or any likeness of any thing that is in heaven above, or that is in the earth beneath, or that is in the water under the earth”** (Exodus 20:4).
- ▶ Christian writer, Augustine observes that **illusionary images, like actors, are lying**. An actor on a stage lies because he is playing a part, trying to convince you that he is a character in the script when in truth he is not. **An image lies because it is not the thing it claims to be.**

THE ART OF THE BOOK

Manuscript: a book or document written by hand rather than typed or printed. Manuscripts that survive from the European Middle Ages are generally religious books that reflect the practices of Christianity. Books that contain artistic decoration are called illuminated manuscripts.

- ▶ Most common artistic medium that survives today. A medieval manuscript is a codex (pl. codices), meaning a book made of pages bound between two boards- thus higher chance of survival
- ▶ The earliest manuscripts of the Bible do not survive- only exist because scribes made copies of them
- ▶ Recording and disseminating information is quick and easy today, but in the Middle Ages this process was slow and laborious- but was essential to the preservation of knowledge
- ▶ Manuscripts were important to the spread of Christianity- monks would travel and bring books with them to preach the religion

THE BLACK DEATH (1347-53)

"In...1348 the deadly plague broke out in the great city of Florence...**Whether through the operation of the heavenly bodies** or because of **our own iniquities, which the just wrath of God sought to correct**, the plague had arisen in the east some years before, causing the death of countless human beings. It spread without stop from one place to another until, unfortunately, it swept over the west ... **Such was the cruelty of heaven and to a great degree of man** that between March and the following July it is estimated that more than 100,000 human beings lost their lives within the walls of Florence."

- ▶ Mysterious disease known as "black death" (bubonic plague)
- ▶ Killed 20 million people in Europe (30% of its population)
- ▶ Especially fast spreading in cities
- ▶ Consequence of trade, increased mobility, cities becoming more dense, bad sanitation, lack of medicine
- ▶ Political instability, people in power had to legitimise themselves

Key concepts of the Renaissance

- ▶ **Return to antiquity:** things that had gotten “lost” in the Middle Ages were rediscovered (contrapposto, naturalism, philosophy, sciences)
- ▶ **Humanism:** stresses the importance of the human rather than the divine; emphasis on education and on expanding knowledge (of classical antiquity)
- ▶ **Golden Age:** a self-conscious golden age bursting with culture, art, discovery, and vying with the ancients for the title of Europe’s most glorious age

Characteristics of Renaissance art

- ▶ Subject matter grew from mostly Biblical scenes to include portraits and events from contemporary life
- ▶ Realism in the depiction of the human form and space
- ▶ Linear perspective to accurately translate three-dimensional forms in a two-dimensional space.
- ▶ New art economies- making art seen as a legal, economic transaction
- ▶ Social status of artist elevated to that of a scholar

The philosophy of Humanism

Leonardo Da Vinci
The Vitruvian Man
c. 1487

- ▶ Intellectual movement embraced by scholars, writers, and civic leaders in 14th century Italy.
- ▶ Emphasised "an education befitting a cultivated man," and saw the human individual "as the measure of the universe."
- ▶ The philosophy was connected to a vision in a new society: the individual's relationship to God was no longer exclusively defined by the Church.
- ▶ The subject matter of art was widened to include secular, rational subjects.
- ▶ exploration of individual potential and desire to excel

Handwritten text in Italian script, likely a preface or introduction to the drawing. It begins with 'L'UOMO' and discusses the proportions of the human body.

Handwritten text in Italian script, likely a continuation of the text above the drawing. It includes a small diagram of a scale or ruler with tick marks and further descriptive text.

Handwritten notes in Italian below the drawing, detailing the proportions and measurements.

Handwritten notes in Italian at the bottom of the page, continuing the discussion of proportions.

- ▶ Surrounded by notes based on the work of the famed architect, Vitruvius Pollio
- ▶ Emphasises qualities of balance, symmetry and proportion shared by God's creation (man) and man's creation of buildings
- ▶ The drawing and text are sometimes called the Canon of Proportions or, less often, Proportions of Man
- ▶ early example of the way in which his studies of proportion fuse artistic and scientific objectives

PERSPECTIVE

- ▶ **Vanishing point:** the point at which all the orthogonals meet.
- ▶ **Orthogonal:** name for architectural lines that head straight towards or away from the viewer.
- ▶ **Aerial perspective:** The use of dull or dark colours in the background of a landscape to convey depth
- ▶ **Linear perspective:** creating a sense of depth in an architectural space by using orthogonals and a vanishing point.

1495-98

John Berger notes, "The convention of the perspective fit in perfectly with the ideals of Renaissance humanism because it structured all images of reality to address a single spectator who unlike God could only be in one place at one time."

LIGHT AND SHADOW

Sfumato = smoke: hazy quality that softens the outlines, removes the sharp outlines, makes it atmospheric and creates a sense of unity in the painting, makes the figure emerge out of the darkness

Mona Lisa
Leonardo da Vinci

c. 1503-19
Louvre, Paris.

Chiaroscuro: (from Italian *chiaro*, "light," and *scuro*, "dark") A technique employed in art to represent light and shadow to show the volume of three-dimensional objects.

Glazing: applying thin layers of oil paint that are almost translucent (10-15 layers) one on top of the other, softness, modeling enhances the sensuality

A Golden Age?

- (1) an era that achieved great things, art, science, innovation, literature, an era whose wondrous achievements later eras marvel at
- (2) a good era to live, prosperous, thriving, stable, reasonably safe, with chances for growth, social ascent, days when hard work pays off, in short an era which—if you had to be stranded in some other epoch of —you'd be likely to choose.
